

PICKUP SYSTEMS' POLYPODS are beneficial for any fleet or business offering several advantages over traditional body building methods including:

- Lightweight.
- Impact resistant.
- 100% recyclable.
- Shower resistant.
- Structurally strong.
- 100Kg roof rating.
- Maximised storage space.
- Easy fitment - fixed using existing lashing points, no drilling required.
- Colour coded to vehicle.

Constructed out of 9mm polypropylene plastic, the PolyPods are built not using moulds, so can be easily configured to each customers' needs.

The sealed PolyPod drops in to the pickup bed and doesn't seal against existing load bed edges like Truck Tops do, making them weatherproof.

The removal of the tailgate increases accessibility.

Options can include:

- Solid rear door.
- Internal rear drawer with a 250Kg SWL.
- False floor and side access shelving.
